DETAILED ACTION

Allowable Subject Matter

Claims 1-13 are allowable.

The following is an examiner's statement of reasons for allowance: claims 1-13 are allowed because the references cited fail to teach, as applicant has, a method in a physical layer transceiver coupled to a prescribed network medium having an undetermined length, the method comprising supplying a prescribed initial set of equalizer settings to a digital feedforward equalizer, the digital feedforward equalizer configured for outputting equalized signal samples based on equalizing retrieved signal samples, having encountered intersymbol interference by transmission via the prescribed network medium, according to supplied equalizer settings, comparing the equalized signal samples relative to a prescribed equalization threshold, and selectively changing the supplied equalizer settings, based on the comparing step, until the equalized signal samples reach the prescribed equalization threshold; and a physical layer transceiver configured for retrieving signal samples from a prescribed network medium having an undetermined length, the physical layer transceiver comprising a digital feedforward equalizer configured for generating equalized signal samples from the retrieved signal Samples and based on supplied equalizer settings, the retrieved signal samples having encountered intersymbol interference by transmission via the prescribed network medium, and an equalizer controller configured for supplying the supplied equalizer settings to the digital feedforward equalizer, the equalizer controller configured for supplying a prescribed initial set of equalizer settings and comparing the
